

General Questions: What does ETD stand for?

ETD stands for Electronic Thesis and Dissertation.

An ETD has three elements,

- a plain text metadata record describing the origin, themes and content of the thesis.
- one single Portable Document Format (PDF) file containing the full-text of the thesis.
- a clear declaration from the copyright-owner stating the level of access granted to the full-text and associated metadata record.

Unique solution ID: #1000
