

General Questions: Do I still have to submit a paper version of my thesis?

Yes.

For examination purposes traditional bound paper copies of your thesis must still be handed in to your department or faculty. All current rules and guidelines will still apply in terms of the formatting and submission of paper theses.

IMPORTANT: We strongly recommend that you print your paper copies directly from the Portable Document Format (PDF) file that you have submitted. When you complete your ETD submission you will be prompted to download your electronic version to print the appropriate number of paper versions for submission to your department/faculty.
